8100

8100 with backlit topper

The low-cost ATM for low-traffic locations.

The 8100 is our lowest cost ATM designed for merchants with low-traffic, tended locations who are over served by bigger, more expensive ATMs.

Our basic model, the 8100, will take up the least amount of floor space, yet provide all the customer convenience associated with having an ATM at your location. This smaller design makes the 8100 ideal for virtually any location, and turns extra floorspace into a profit center.

The 8100 includes the basic essentials for an ATM, making it easier for merchants to manage, all at the most cost-competitive price.

The 8100 features Triton's own TDM-50 dispensing mechanism, which requires the least amount of steps to handle. With features such as a top loading profile and a single cassette that slides in and out, the TDM-50 requires less time for the merchant to load.

Because it's from Triton, you can count on the 8100 delivering unparalleled reliability and quality. The 8100 incorporates state-of-the art electronics and a key-lock mechanism, most suitable for tended locations.

The 8100 features VISA Encrypting PIN Pad (VEPP) and Triple DES, the new standard for PIN encryption. Furthermore, the 8100 meets all ADA requirements.

Triton's cost-competitive 8100 is designed with low-cost and low-traffic locations in mind.
